

Queue

Joe

Jeet

Matt

B: Existing contact added by Jeet. Joe sends an e-mail again (after 7 days), we re-queue them in Joe's queue

C: Existing contact added by Matt. Matt sends an e-mail again (after 7 days), we re-queue them in Matt's queue

When go to classify page, have a backend route that queries all the unadded contacts, ordered by date, that you know.

When go to classify page, have a backend route that queries all the unadded contacts, ordered by date, that you know.

Classify Queue

- New users parsed
- People who have been already added, but recently e-mailed

Skipped later people should be available through a different route, by keeping a separate queue

Separate collection to keep track of people excluded

- user
- contact
- last classified
